Yakir Nisim Shlomo

shlomoyakir00@gmail.com | 052-464-2361 | YakirShlomo | Yakir (Nisim) Shlomo

Final-year Software Engineering student with hands-on experience building user interfaces and systems using **AI**, with **React**, **Next.js** and **TypeScript**. Using this approach I built many landing pages and full interfaces for real production systems, including separate dashboards per user type, real-time chat and admin panels. Solid understanding of Backend and APIs. Looking to join a software development role.

Projects

Tula Inventory | *2026*
A **Full-Stack** system for managing events, inventory, expenses and profits. Built the management interface in React and TypeScript, including automatic inventory updates, management via Telegram, scheduled reports and sync with iCloud Calendar.
Technologies: React, TypeScript, SupaBase, PostgreSQL, Telegram Bot API, CalDAV.

TaxFolder | *2026*
A multi-user system for accountants with a separate interface per user type - Admin, Accountant and Client. Includes client and document management, real-time chat, notifications and secure file access. Deployed on-Vercel.
Technologies: Next.js, React, TypeScript, SupaBase, PostgreSQL, Redis, Vercel.
